**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. ~~Claims 1, 2 and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated~~  
by Takano et al. (Takano) (US 5,053,814).

Takano teaches an image forming apparatus that detects the type of media wherein all of the claimed circuitry of claims 1, 2 and 17-19 is either explicitly or inherently taught as is evidenced by the fact that the printer automatically determines the type of media and its characteristics and attributes loaded in the paper cassette. The image forming apparatus also provides for inhibiting image forming when determination of media type currently in the cassette is unacceptable. (please note col 6, line 37 – col 7, line 39).

***Allowable Subject Matter***

3. Claims 21-38 allowed.

4. Claims 3-16, 20 and 39-40 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

5. Applicant's arguments filed 4/30/04 have been fully considered but they are not persuasive.

Applicant argues Takano does not disclose a discriminator which stores reference information representing acceptable recording material.

Takano shows the discrimination process in the unusable cassette identification processing step in col 6, lines 42-48.

The arguments pertaining to the remainder of the claims were persuasive and the rejections were withdrawn.
